2. HAZARDS IDENTIFICATION

- Acute Toxicity: Inhalation, Category 4
- Skin Corrosion/Irritation, Category 2
- Corrosive To Metals, Category 1

**GHS Signal Word:** Warning

**GHS Hazard Phrases:**
- H315 - Causes skin irritation.
- H332 - Harmful if inhaled.

**GHS Precaution Phrases:**
- P261 - Avoid breathing dust/fume/gas/mist/vapours/spray.
- P264 - Wash hands thoroughly after handling.
- P271 - Use only outdoors or in a well-ventilated area.
- P280 - Wear protective gloves/protective clothing/eye protection/face protection.

**GHS Response Phrases:**
- P362 - Take off contaminated clothing and wash before re-use.
- P302+352 - IF ON SKIN: Wash with plenty of soap and water.
- P304+340 - IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- P312 - Call a POISON CENTER or doctor/physician if you feel unwell.
- P321 - Specific treatment see Response/First aid section on this label.
- P332+313 - If skin irritation occurs, get medical advice/attention.

**GHS Storage and Disposal Phrases:**
- No phrases apply.

**OSHA Regulatory Status:**
- This material is classified as hazardous under OSHA regulations.

**Potential Health Effects**

**Acute and Chronic:**
- Causes serious eye damage. Causes severe skin irritation. Corrosive to mouth, esophagus and stomach. Chronic: None.

**Inhalation:**
- Mist may be severely irritating to nose, throat and lungs depending on concentration and duration of exposure.

**Skin Contact:**
- Corrosive, causes permanent skin damage (scarring).

**Eye Contact:**
- Corrosive. Will cause eye burns and permanent tissue damage.

**Ingestion:**
- Low order of Toxicity.

Additional Chemical Information

4. FIRST AID MEASURES

Emergency and First Aid Procedures:

In Case of Inhalation: In case of adverse exposure to vapors and/or aerosols, immediately remove the affected victim from exposure and get immediate medical attention. If breathing is difficult, give oxygen. If breathing stops, give artificial respiration. No specific treatment is necessary since this material is not likely to be hazardous by inhalation.

In Case of Skin Contact: Immediately wash skin with soap and plenty of water. Remove contaminated clothing. Get medical attention if symptoms occur. Wash clothing before reuse.

In Case of Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes. Get immediate medical attention.

In Case of Ingestion: If swallowed, do NOT induce vomiting. If victim is fully conscious, give a cupful of water. Keep victim warm and quiet. Get medical aid immediately. Never give anything by mouth to an unconscious person.

Indication of any immediate medical attention and special treatment needed:

Use first aid treatment according to the nature of the injury.

Note to Physician: Treat symptomatically and supportively.

5. FIRE FIGHTING MEASURES

Flammability Classification: non-flammable

Flash Pt: NP

Explosive Limits: LEL: N.A. UEL: N.A.

Autoignition Pt: NP

Suitable Extinguishing Media: Not available.

Unsuitable Extinguishing Media: Unknown.

Fire Fighting Instructions: As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Material will not burn. Containers can build up pressure if exposed to heat (fire). Use water spray to keep fire-exposed containers cool.

Flammable Properties and Hazards: Not flammable or combustible.

Hazardous Combustion Products: Phosphines, Carbon monoxide, Carbon dioxide, Oxides of Nitrogen.
6. ACCIDENTAL RELEASE MEASURES

Protective Precautions, Protective Equipment and Emergency Procedures:
Where splashing is possible, full chemically resistant protective clothing (e.g. acid suit) and boots are required.

Environmental Precautions:
Observe all federal, state, and local environmental regulations.

Steps To Be Taken In Case Material Is Released Or Spilled:
Spills/Leaks: Absorb spill with inert material (e.g. vermiculite, sand or earth), then place in suitable container. Water Spill: Prevent additional discharge of material if possible to do so without hazard. Warn occupants and downstream/downwind areas of release of corrosive hazardous material and request all to stay clear. This material will sink and is soluble/dispersible in water, it is probably not recoverable. Notify Authorities. LARGE SPILLS: Shut off leak if safe to do so.

7. HANDLING AND STORAGE

Precautions To Be Taken in Handling:
Handle and open container with care. Keep from contact with oxidizing materials.

Precautions To Be Taken in Storing:

Other Precautions:
Wash thoroughly after handling.

Recommended Exposure Limits:
Exposure limits are NOT established or are unavailable.

Respiratory Equipment:
Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls.

Eye Protection:
Chemical safety goggles. Face shield.

Protective Gloves:
Wear appropriate gloves to prevent skin exposure.

Other Protective Clothing:
Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield.

Engineering Controls:
Ventilation should be provided to control worker exposures and prevent health risks and as necessary to reduce, prevent and control dust, mist, vapor or aerosol generation. There are no special ventilation requirements.

Work/Hygienic/Maintenance Practices:
Wash thoroughly after handling. Wash hands before breaks and at the end of workday. Handle in accordance with good industrial hygiene and safety practice.

Environmental Exposure Controls:
Use with adequate ventilation.
9. PHYSICAL AND CHEMICAL PROPERTIES

13. DISPOSAL CONSIDERATIONS

Waste Disposal Method: Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. US EPA guidelines for the classification determination are listed in 40 CFR Parts 261. Additionally, waste generators must consult state and local hazardous waste regulations to ensure complete and accurate classification. Empty containers retain product residue (liquid and/or vapor) and can be dangerous. Empty drums should be completely drained and properly bunged, then promptly returned to a drum reconditioner, or properly disposed of.

Waste Disposal Method: D002
